DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 44-97 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wyckoff #3,386,876 in view of Mercer #4,374,798. Wyckoff discloses the claimed invention except for the orientation of strands extending into the bars. Mercer teaches the orientation of strands into the bars as set forth at column s 3-4, lines 56-8. It would have been obvious to one having ordinary skill in the art at the time the invention was made to orient the strands into the bars, as taught by Mercer in order to facilitate production of a high tensile strength mesh structure.

Response to Arguments

3. Applicant's arguments with respect to the respective claims have been considered but are moot in view of the new ground(s) of rejection.
